

AMENDMENTS TO THE ABSTRACT

Please insert the following paragraph(s), after page 27, as the abstract of the currently filed specification:

-- ABSTRACT

The invention relates to a multi-layer biaxially oriented polypropylene film consisting of a base layer at least one first cover layer. The base layer contains a hydrocarbon resin, and the cover layer contains a polydialkylsiloxane with a viscosity of at least 200.000 mm²/sec. The first cover layer is provided with a cold-seal adhesive coating on its outer surface. --
